

French society and politics

We offer students the possibility to learn about contemporary French society and cultures by examining its products, practices and perspectives through thematic study.

This seminar intends to present the main aspects of the French society, compared with other European industrialized countries. Indeed, the main objective is to analyze how the French society works, taking into account some of the main historical steps which established the basis of the welfare system, of the labor market, the role of women in society, the system of education, globalization etc.
